

Sunrise Medical Canada Inc. Equipment Webinars

2021-2022

Best practices of seating and mobility evaluations include having an understanding of technology available, both “old technology” and “new technology”.¹ This fosters the prescription of the most appropriate technology for an individual.

Sunrise Medical Canada Inc. hosts product webinars to help you stay informed of updates to existing products and new equipment launches. Each live webinar will provide an in-service on the product, including key features and its clinical application. Presentations are led by members of the Sunrise Medical Canada Inc. sales and education team.

Each 30-minute webinar topic is offered at 4 different times! Select the time that is best for you. A Certificate of Attendance is available after each session.

See page 2 for the schedule. Register for any or all of the webinars by clicking on the link below (or cutting and pasting the link into your browser):
